

LINDO SANIGEN

Technical Data Sheet 02/17 en

DEFINITION

Concentrated neutral detergent with rinse-aid, non-ionic surfactants, vegetable-extract sanitizers and synergic agents.

USE AND PERFORMANCES

Specific sanitizing cleaner for all washable surfaces, even those treated with waxes and/or polymeric resins.

Ideal for frequent cleaning of natural matt Porcelain tiles.

The combined action of surfactants and vegetable-extract sanitizers is especially efficient for removing heavy soiling from grouts and roughness of the floor.

Tuned with the most advanced environmental-care guidance, the sanitizing action is provided by the combination of active principles both synthetic and natural, derived from vegetables and spices.

LINDO SANIGEN (GEAL) is then recommended for the ordinary cleaning of premises needing constant sanitization. Its neutral pH and its active ingredients are the warranty for a non-aggressive cleaning action without damages to the protective treatment.

The special rinse-aid additive contained in **LINDO SANIGEN** reduces opacity and keeps the original shine of floors.

USE MODALITY

Use pure or diluted, depending on the kind and consistency of soil.

For a normal ordinary maintenance, dilute from 3% to 5% (approx. half/one glass of LINDO SANIGEN in 4 litres of water). Rinsing is not needed when used at this concentration.

Indicative consumption: depending on dilution and soil.
